

8400 series

Industrial Mobile Computer

Purposely designed to improve productivity, the 8400 series puts powerful mobile applications with fast and easy data access in the hands of the workers always on the go. An optimal combination of functionality, value and features in a rugged, ergonomic form, the 8400 series is ideal to accelerate warehousing activities and quickly deploy integrated applications.

8400 series

Industrial Mobile Computer

Improve productivity

The 8400 enables smarter decisions and enhanced business agility by taking powerful data applications directly to the point of work. You'll reap the benefits in warehousing stock control, picking and order processing, manufacturing goods control, retail in-store, DSD, and field sales force automation.

Streamline complication

Accelerate warehousing and data management tasks all shift long with the 8400. Intelligent design makes it easy to view information, quickly enter data, and communicate wirelessly to peripherals and servers. It's quick to deploy, rugged, and reliable, delivering low TCO (total cost of ownership) throughout its long life. No matter how you measure, the 8400 series is smarter—for the worker, IT and the business.

Power Suite maximizes your abilities

Cipherlab's Power Suite helps you create custom configurations and mobile applications, quickly and efficiently.

FORGE application generators custom-build an application that's perfect for your situation.

MIRROR terminal emulators combine the complexity of mainframe applications with mobile versatility.

BLAZE compilers turn C or Basic Code into efficient applications.

Terminal Emulation Extends Mainframe Applications

In today's technology-evolving environment, mobilizing applications running on existing mainframe systems is the smart, low-cost to catch operation efficiencies up to date. A purposely designed, rugged mobile computer, the 8400 with terminal emulation programs mobilizes a warehousing workforce and extends applications from a workstation to the point of work.

The 8400 is able to emulate terminals VT100, VT220, and TN5250. A bigger, brighter display, function-specific alphanumeric keys and extended battery life bring the power of terminal emulation to the work floor anytime you wish to do so.

When a proprietary OS is ideal

The smartest business outcomes match function to the task at hand. Warehousing and manufacturing applications don't benefit from color pictures for efficient workflows—instead, they need the 8400's computing power, flexibility, and features.

Without an elaborate operating overhead, the 8400 puts a lighter load on the processor, giving maximum work time between battery charges. And, because it won't need frequent system and security updates, the 8400 series needs less maintenance for lower TCO and higher ROI (return on investment).

8400 series

Industrial Mobile Computer

Powerful, mobile terminal emulation with data capture and wireless capabilities for efficient warehousing operations

For small to massive operations, when mobile workers use more effective tools, they accomplish more accurate work together, faster.

CAPTURE MORE DATA—STORE MORE DATA

The 8400 offers a choice of linear imager, laser and 2D imager to give you the right reader for your situation. With 4MB or 16MB onboard storage, the 8400 features one MicroSD slot with SDHC support.

SEE MORE INFORMATION—GET MORE DONE

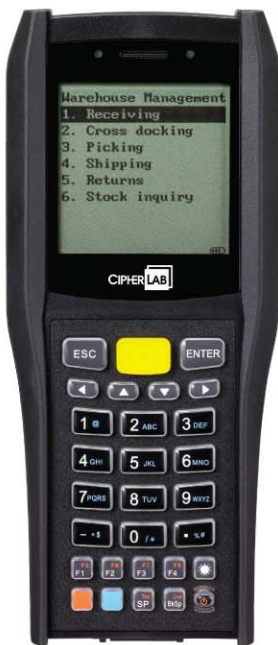

The largest-in-class backlit, 2.6-inch, 160×160 pixel display makes work easy, even in dark corners. A 39-key keypad with 20 function keys or a 29-key keypad with 8 function keys allows you to match the format to your needs. You quickly see why the 8400 series is the best choice for warehousing operations.

STAY COMPLETELY MOBILE ALL SHIFT LONG

Nothing stops work faster than no data access or loss of power. That's why we designed the 8400 series with wireless communications and advanced power efficiency.

Both BT and wireless LAN 802.11 b/g allow easy access to peripherals and data without restrictive cables. Wireless LAN connectivity stays safe with multiple built-in security protocols. And the 8400 series delivers 35 hours of wireless terminal operation (over 100 hours for batch only) to get through the shift with power to spare.

KEEPS YOU WORKING, EVEN IN HARSH ENVIRONMENTS

Bumps, drops, cold, heat, water, humidity, and constant use: all enemies of electronics. We designed the 8400 series to work in the most difficult environments. It's built to demanding IP54 standards and easily survives 1.5 m impact and 1 m tumble testing.

QUALITY VALUE OF TODAY'S
AIDC SOLUTIONS.

SPECIFICATIONS

8400 series

Industrial Mobile Computer

8400

8470

	Options	8400	8470
Communication		BT Class 2 compliance	BT Class 2 compliance IEEE 802.11 b/g
	BT profile	SPP, DUN, HID	
	WLAN security	---	WEP, EAP, WPA (PSK), WPA2 (TKIP, AES, PSK)
Performance	CPU	32-bit	
	Program memory	4MB flash	
	Data memory	4MB/16MB SRAM	
	Expansion	micro SD slot with SDHC support	
	Operating power	Rechargeable lithium battery: 3.7V, 1800 mAh	
	Backup power	Rechargeable lithium battery: 3.0V, 18 mAh	
	Working hours ¹	110 hours ²	35 hours ³
	Data retention	25 days	
	Alert	Two dual-color LEDs (red/green, blue/green), vibrator, volume programmable beeper	
Data capture	Barcode scanning	Linear imager / Laser / 2D imager	
Physical characteristics	Display	160x160 display, white LED backlight	
	Keypad	29 or 39 rubber keys, white LED backlight	
	Dimension L x W x H	170.6 x 72.1 x 40.6 mm / 6.7 x 2.8 x 1.6 in.	
	Weight laser including battery	295 g / 10.4 oz.	
User environment	Operating temperature	-10° to 55°C / 14° to 131°F	
	Storage temperature	-20° to 70°C / -4° to 158°F	
	Humidity non-condensed	Storage 5% to 95% Operating 10% to 90%	
	Impact resistance	Multiple 1.5 m drops onto concrete, 5 drops on each side, 1000 tumbles at 100 cm, IP54	
	Electrostatic discharge	±15kV air discharge ±8kV direct discharge	
	EMC regulation	BSMI, CE, C-Tick, FCC, IC, CCC, NCC, SRMC TELEC for 8400 only	
Development support	CipherLab Power Suite BLAZE C Compiler and BASIC Compiler		
Application software	CipherLab Power Suite FORGE Application Generator including data transmission OCX, MIRROR Terminal Emulator		
Cradles	Charging and communication cradle, Ethernet cradle, GPRS cradle (EDGE/Quad-band, FCC certified)		
Accessories	4-slot battery charger, protective cover, RS232 charging and communication cable, USB charging and communication cable		
Warranty	1 year		

¹ Based on one standard laser scan per five seconds with backlight off.
² Batch mode/BT off: 110 hours / BT on is 65 hours.
³ BT off/IEEE 802.11 b/g on. The test is based on one broadcasting packet per second.
